

# RICHES WERE FOR FROM SEARCHLIGHT

## Railroad Connection With Salt Lake Will Enable Very Rapid Development.

### MEANS INCREASE FOR GREAT VALLEY SMELTERS

Many Prospects Developing Into  
Steady Producers Equal  
to Older Mines.

Special to The Tribune.  
SEARCHLIGHT, Dec. 24.—The new  
railroad lately incorporated and financed  
in Salt Lake to give this fine gold camp  
an all-rail haul for its rich ores to the  
Utah smelters, over the Clark line from  
Nippeno, signals the dawn of a new era  
in its development. It seems not to be  
generally understood by the public that  
Searchlight is the greatest all-gold camp  
in Nevada today, but in its great Quar-  
rette property it really contains the great-  
est gold mine under present operation in  
the State.

### Big Offer Turned Down.

The Quarrette has been opened only to the  
800-foot level and it has been marketed  
but slightly over \$100,000 worth of ore,  
mainly broken in doing development,  
while its reserves in sight are responsibly  
estimated at \$100,000. It is reported that  
the company has turned down an offer of  
\$100,000 for the property from Boston  
parties. And it is reported that a north  
extension near the Cyrus Noble mine,  
some 400 feet from its main shaft and  
mill, which is in line and gives good  
promise of doubling the value of the property  
during the coming year.

### Conservative Policy of Quarrette.

The policy of the Quarrette property  
has been, for the most part, extremely  
conservative, and it is only at long  
time the only big mine in the camp and  
is still the greatest. Searchlight has nat-  
urally adopted a most unusually conserva-  
tive policy, and it is only at long time  
it is proud of its record as "the camp without  
a failure," but most any camp could  
match that record if the same cautious  
and conservative policy that has marked  
the development of Searchlight up to the  
present were adopted.

### Ground Carefully Studied.

They have studied and prospected their  
ground carefully and the reason they have  
up to the present recorded not a single  
failure. This is the more remarkable  
from the fact that the ground possesses  
some unique features that render it a  
camp by no means easy to prospect,  
though its ore is of the highest quality  
well understood and the field of operations  
has lately been very much extended.

### Values Are Not on Surface.

Some very high values have been de-  
veloped in quantity at depth, but not  
close to the surface, where the grade sel-  
dom exceeds a fall milling average of \$7  
to \$10 a ton. But it is free and amenable  
to ready. And, singular to say, it is as  
free below the water level as above.  
This fact offers a considerable distance out  
in the desert, and this theory, if correct,  
would greatly extend the field of legiti-  
mate operations.

### Geology Should Be Determined.

Development will settle the geology of  
this camp in time, but the fact it might  
prove of great practical value to the  
camp to have the geological formations  
investigated thoroughly by the United  
States geological survey, as I think, the  
two distinct vein systems, as I think, the  
east-west veins should be found under the  
watch for a considerable distance out in  
the desert, and this theory, if correct,  
would greatly extend the field of legiti-  
mate operations.

### Never Wanted a Boom.

Searchlight has never tried for a boom  
and never wanted one, but it has been  
to the camp within a few months and a  
score or more of developing prospects  
have come in. It is safe to say that the  
good list of her bonanza gold mines. It  
will be hard for her to avoid a boom and  
a rush very early in 1906. In fact, the  
first waves of a boom are already being  
felt. Searchlight has been slow to  
golden strand already. Miller, the stage  
and freight line man at Nippeno, has his  
hands full handling the increased travel  
to the camp and sometimes has to send  
out three stages a day. The hotels of the  
camp are filled every night and a fine  
new hotel is projected against the coming  
of the railroad.

### High-Grade Ore Waiting.

There is also a great deal of high-grade  
ore in the camp awaiting the railroad to  
ship to the Salt Lake smelters—several  
thousand tons. It is safe to say that the  
climate in Searchlight is delightful.  
The few cottonwoods which the town  
contains still retain their leaves, and the  
one lonesome little flower garden has  
roses in bloom at this writing. Neither  
rain nor summer heat is very extreme in  
the camp. The altitude is 3,500 feet and  
the nights are always cool.

### Plenty of Fine Water.

The water at this desert camp is not,  
for a wonder, at all tainted by alkali, but  
is quite pure. The town contains a ten-  
ton ice plant in connection with a cold  
storage plant, and altogether Searchlight  
is a very comfortable place. The great  
mines have their own water supply  
system and furnish free baths to their  
workmen all the year round. It has not  
at all the aspect of a hurray camp, as  
it is well built and looks as if it had come  
to stay, as it surely has, for the mines of  
the camp improve regularly with depth.

### Operations at Quarrette.

The Quarrette is now pushing its in-  
cline from the 800-foot level to the 1,000-  
foot level and the vein increases in volume  
and value with every station downward. It  
operates a twenty-stamp amalgamation  
mill at the mine drawing its water from  
the mine and re-using it after settling  
through a series of tanks. It has another  
twenty-stamp mill at the 1,000-foot level,  
connected with the mine by a narrow  
gauge railroad, but this also will now be  
removed to the mine.

### Cyrus Noble Is Great Mine.

The Cyrus Noble is considered as the  
making of a mine great even that the  
great Quarrette. It is a producer of bon-  
anza values and has just put in a ten-  
stamp mill, which, like all the other mines  
of the camp, will receive its water from  
the mine. It has reached the 800-foot level  
and will continue sinking as soon as the  
mill is ready to handle the ore. It is  
doing development work. Like all the  
mines of this cautious and conservative  
camp, it is following its ore on the incline  
and doing only development work. Like  
all the others, also, it will sink a double-  
compartment vertical shaft to operate the  
property when the ore bodies have been  
fully explored to the 1,200-foot level. The  
Cyrus Noble is on a north-south vein of  
which the Quarrette company owns the  
southern extension, on which it is also  
operating and getting high values.

### Duplex Fraction Active.

The Duplex and its Fraction, adjoining  
the Cyrus Noble, is one of the great  
mines of the camp. It is now starting a  
double-compartment vertical shaft 100  
feet deep to open its group of claims sys-

# RARE METALS FOUND IN A NEVADA CAMP

## Tungstate Discovered in Esmer- alda County by an Ogden Man.

Special to The Tribune.  
OGDEN, Dec. 24.—Lorenzo Farr, who  
has been operating in Esmeralda county,  
Nevada, reports to his friends in Ogden  
that he has made a discovery of one of  
the rare metals, namely tungstate, in  
some claims that he has located near  
Sodaville. The discovery, according to his  
letter, is an important one. Tungstate  
is one of the rarest of the metals and  
is used in the steel industry in Germany  
for hardening of the big guns. It is said  
that already \$500 worth of the ore con-  
taining the metal has been extracted,  
though the discovery was made but a day  
or two ago.

### FIND FLOURINE.

Nevada Miners Find Mineral in Con-  
siderable Quantities.

Nick Parrish, who has prospected these  
hills for many years, and has interests in  
the coming properties, returned from a  
prospecting trip to Slate range and Gold  
mountain on Tuesday. He says the Slate  
range has a group in Slate range that  
shows flourine in considerable  
quantity. The ore is found in a ledge  
four to eight feet in width, and is out-  
croped in a number of places.

### Lone Mountain Booming.

Lone Mountain is enjoying a good, sub-  
stantial boom at present. It has another  
good mine, which is in great de-  
mand, and the entire district is close to  
it. The district is close to it. The district  
is close to it. The district is close to it.  
The district is close to it. The district  
is close to it. The district is close to it.

# TWO DROWN WHILE SKATING

## Six Youngsters Go on Thin Ice and Fall Into River.

LOGANSPOUT, Ind., Dec. 24.—Re-  
ports of the warrent of the police  
show that the ice on the Wabash river was  
unsafe, six young lads this afternoon  
formed a skating party, with the re-  
sult that two were drowned. The other  
four had narrow escapes.

# FREE GOLD ORE FROM VIRGIN RIVER

## Found on Grey Eagle Group of Claims South of Caliente.

### OWNERS ARE TWO MEN FROM CHEYENNE

#### They Hope to Erect Ten-Stamp Mill Within Sixty Days.

Special to The Tribune.  
CALIENTE, Nev., Dec. 24.—Joe Dunbar  
and Hank Willis, owners of the Grey  
Eagle group of gold claims on Virginia  
river, south of Caliente, brought in  
samples of free gold ore taken from a  
230-foot tunnel run in a two-foot vein  
of white quartz, showing assay values of  
\$154 per ton. They were en route to  
Cheyenne, Wyo., their home, where they  
anticipate raising money to erect a ten-  
stamp mill for the reduction of their ore  
within the next sixty days. They state  
they have over 300 tons of this ore in  
sight and 200 sacks of the same character  
are sacked and ready for trial shipment.

### With Her Own Husband.

"One would imagine that to be en-  
gaged for two or three hours nightly in  
breaking fractions, if not the whole, of  
the decalogue, would be subversive of  
good conduct, but no, the same woman  
who at 10 o'clock has forged or po-  
isoned or stolen, or committed any of the  
conjugal duties, will be found at mid-  
night partaking of a light repast in the  
company of her own husband."

# SOME OF THE DANGERS THAT BESET ACTORS

## Conscientious One May Forget His Identity in Private Life.

LONDON, Dec. 24.—Adolphus Vane  
Tempest, the well-known actor, has  
just amused if not startled London by  
an interview advancing many unique  
ideas. Among other things Mr. Vane  
says:

### Has Demoralizing Effect.

"There is always the question of the  
demoralizing effect of acting upon ac-  
tors and actresses. How awful it would  
be if the middle-aged actor became  
in real life a universal meddler. Still  
more appalling is the thought that the  
impersonator of comic characters  
should become so infected with comedy  
as to acquire the habit of being funny  
to his own account in his home or at  
his club.

### With Her Own Husband.

"One would imagine that to be en-  
gaged for two or three hours nightly in  
breaking fractions, if not the whole, of  
the decalogue, would be subversive of  
good conduct, but no, the same woman  
who at 10 o'clock has forged or po-  
isoned or stolen, or committed any of the  
conjugal duties, will be found at mid-  
night partaking of a light repast in the  
company of her own husband."

### MOTHER DYING; CONVICT OUT

# The Christmas Rush Over

You'll may be need some of the needful lit-  
tle things for your own use.  
They're here in well chosen quantities, well  
selected tasty patterns.  
Shirts, underwear, neckwear, gloves,  
suits and overcoats.  
Everything for men to wear but shoes.

## A. H. Crabbe Co.

20 MAIN STREET

# HUSLER'S FLOUR

A Merry Xmas  
And a  
Happy New Year  
Is sure to follow  
The use of  
HUSLER'S  
FLOUR

On one point Mr. Vane Tempest is  
emphatic. "What can be more destruc-  
tive of man's self-respect," he asks,  
"than the nightly necessity of bedauing  
his unhappy face with pigments of a  
more or less unwholesome and mal-  
odorous nature. Unquestionably, 'make  
up' is demoralizing to the male mind."

# I Have a Book I'll Send You FREE!

It is full of good  
reading for men who  
have lost their  
strength, who suffer  
from Varicose Veins,  
Rheumatism, Lumbago,  
Kidney, and Liver  
complaints or any  
weakness that drains  
your vitality.  
This book tells how I restore health  
and strength with  
Dr. McLaughlin's Electric Belt.

I want every man who is suffering, who  
has been "doomed" and "doomed" without  
benefit, to have this book. I will  
send it free, if you inclose this ad.
